

As a member of the voting public, I oppose repeal of the following FCC rules: 1) Dual Network ownership Rule; 2) Local Television Ownership Rule; 3) Television Radio Cross-Ownership Rule. The reason is: corporate consolidation has been a negative force in industries: especially looking at Enron and the Broker Information rulings of the SEC. In each case the public's interest was substantially harmed. This deregulation must not pass. How can needed empirical evidence be collected pre-facto? But, this de-regulation must not pass, or the murdered freedom of the press will be the post-facto body of empirical evidence. I am against this Deregulation.
